

Movie Viewers' Guide

1. What are two ways that we can tell what New Mexico's climate was like in the past?
2. What do scientists say about how much water there is on Earth?
3. Why do we need to water our trees?
4. List three ways we can save water.

 Albuquerque Bernalillo County
 Water Utility Authority

Movie Viewers' Guide **Answers**

1. What are two ways that we can tell what New Mexico's climate was like in the past? **Tree rings tell us whether years were dry or wet, and pack rat middens tell us what kinds of plants were growing so we can describe the climate.**
2. What do scientists say about how much water there is on Earth? **It doesn't change.**
3. Why do we need to water our trees? **Trees provide shade and in most parts of town, the aquifer is hundreds of feet underground.**
4. List three ways we can save water. **See tips in graphic above.**
